

LabPRO CellPro Cell Culture Dish

Introduction

LabPRO CellPro Cell Culture Dishes are suitable for cell and biological tissue cultivation, as well as bacterium detection. The treated culture surface make them suitable for consistent cell attachment. They come in a variety of sizes including 30x10mm, 60x15mm, 100x20mm, 150x20mm.

- Clear, transparent, and uniformly smooth surface ideal for microscopic observation
- Routine performance test ensures consistent culture conditions for reproducible results
- Raised upper edge on the cover aligns perfectly with the plate bottom, ensuring stable stacking and space efficiency
- Vented cover facilitates stable gas exchange
- Resealable packaging keeps opened packs clean

- Certified RNase/DNase free, Human DNA free, Pyrogen free, Non-cytotoxic
- Sterilized by irradiation

LabPRO CellPro Cell Culture Dish – Treated Surface for Cell Attachment

Product code	Product Description	Qty/Ctn
LPCD03510	35x10 Cell Culture Dish, Treated Surface, Gamma Sterile	500
LPCD06015	60x15 Cell Culture Dish, Treated Surface, Gamma Sterile	400
LPCD09015	90x15 Cell Culture Dish, Treated Surface, Gamma Sterile	240
LPCD15020	150x20 Cell Culture Dish, Treated Surface, Gamma Sterile	80
